1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 4, 5, 8, 12-13, 16, 20, 25-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 4 and claim 25, now limit to a tool shank portion diameter of 3.175 mm or less, but the original disclosure calls for slots made from the tool having the claimed diameter ([005]). Similarly, claims 5 and claim 20, call for a cemented carbide base material having a diameter of 3.175mm or less, which is not correct, rendering all the claims failing to comply with the original disclosure.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 4, 5, 8, 12-13, 16, 20, 25-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimura et al (5,009,705).

Yoshimura et al discloses the claimed coatings (table 5) within the claimed thickness (claim 3) on the claimed substrate and particle size (example 1) with

the claimed amount of cobalt (claim 1). the structure of the bit appears to be the same (column 3, lines 15-17) and it is the examiner's position that the claimed stress and roughness is considered inherent to the material used.

5. Applicant's arguments with respect to claims 4, 5, 8, 12-13, 16, 20, 25-29 have been considered but are moot in view of the new ground(s) of rejection.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
